

# INDUSTRIAL REPRESENTATION PROGRAM FOR ALL METALS SERVICE & WAREHOUSING, INC.

## **ALL METALS CONSTRUCTS CARTERSVILLE STEEL WAREHOUSE**

- All Metals Service & Warehousing, Inc. of Spartanburg SC has built a 136,000 square foot manufacturing and distribution center in Cartersville, Ga. The new facility replaces the company's previous location in Marietta, GA.
- The company is the Southeast's leading regional toll processor of steel. With facilities in South Carolina and Georgia, the company is a value-added outsource that processes, on a fee basis, flat-rolled coils owned by steel or aluminum mills and trading companies. It's services include traditional steel service center processes of slitting and cutting-to-length and higher value added processes of blanking and embossing.
- The new 136,000 square foot Cartersville facility doubles the production capacity of the previous Marietta plant. With 40 foot ceilings and internal rail service, the warehouse area is now the largest steel warehouse in the area.
- Mike McShane of McShane Realty Partners, Inc. assembled the team to build the Cartersville Steel Warehouse
