

INDUSTRIAL REPRESENTATION PROGRAM FOR CAVERT WIRE COMPANY

CAVERT WIRE CONSOLIDATES MANUFACTURING AND DISTRIBUTION

Cavert Wire Company of Uniontown, Pennsylvania has moved its manufacturing and distribution businesses to a new location in Atlanta, Georgia.

Cavert is a manufacturer of wire packaging devices and has previously acquired the Atlanta operations of Global Strapping Systems, Inc. to expand their product line. The challenge was to integrate the operations of both into a single manufacturing and distribution plant.

The new Plant is a 34,883 square foot free standing building with 2,128 square feet of newly constructed office space. The facility is equipped with 2000 amps of electrical power for manufacturing. Dock doors, drive-in doors, and jumbo doors provide for their shipping requirements.

Mike McShane of McShane Realty Partners, Inc. performed a site location analysis, the survey of available properties, and negotiated the lease agreement for the new facility.
